

# Toshiba Portege M300 Hard Drive Replacement

This will describe how to install a Toshiba Portege M300 hard drive.

Written By: Alison Wendt

## INTRODUCTION

This guide will go through the steps needed to install a new hard drive.

---

### TOOLS:

- [Phillips #1 Screwdriver](#) (1)
-

## Step 1 — Battery

- Turn the computer over onto its back.

## Step 2

- Slide the lock on the left side to the unlock position.
- Slide the lock on the right side to the unlock position until there is a clicking sound.

### Step 3

- Remove the battery by sliding it out while both locks remain in the unlock position.

### Step 4 — Hard Drive

- Turn the computer over onto the back.
- Use a Phillips head screwdriver to remove the screw from the hard drive cover.
- One 8.5 mm fine thread screw.
- Lift and remove the cover.

## Step 5

- Carefully remove the hard drive from the IDE cable by pulling on the black connector (do not pull the orange cable).

## Step 6

- Remove the two gray rubber covers from both ends of the hard drive.

To reassemble your device, follow these instructions in reverse order.
